

Xiaofeng Xie

My Homepage: <https://xiaofengxie.github.io/>

Brief Biography:

- Xiaofeng Xie a Ph.D student of pattern recognition at the South China University of Technology (SCUT). He is member of the SCUT center of Brain Computer Interfaces and Brain Information Processing, which develops brain computer interface, robot control and fMRI processing. The leader of center is prof. Yuanqing Li (IEEE Fellow).
- His current research focuses on nonlinear dimensionality reduction, multilinear subspace learning and graph based semi-supervised learning.
- He is the principal of four project, e.g., image segmentation, speech processing, motor imagery classification and hyperspectral image classification. More details of the projects are shown in his homepage.
- He has published 3 journal papers and 1 conference paper during his Ph.D. Some papers are accepted by the IEEE Transaction journal and Pattern Recognition journal. In addition, he also submits 3 papers to the preprint website (arXiv). More details of papers are shown in his homepage.
